

Websites for Spanish Activities

Rockalingua

Rockalingua.com has a lot of free resources like videos, songs, games, craft activities with tutorials and worksheets. Some of the songs and videos will already be familiar to the children as they have used them in Spanish lessons with Senorita Fernandez. Although the website requires access to some of the resources through a subscription, there are many resources which are clearly labelled as free.

Rachel Hawkes

Rachelhawkes.com has booklets available for KS2. The Year 5 booklets are suitable for 5 and 6. If however, children would like a challenge, they can try the Year 6 booklet.

Duolingo

Duolingo is an excellent free app that can be downloaded to any pc, phone or tablet. The app has speaking, listening and reading activities presented as multiple choice games. The app only works while online and there are sometimes adverts that interrupt unless the paid version is used.

Google Translate

Some activities in Rockalingua are in Spanish. Google translate can convert Spanish to English simply by copying and pasting the text. Although it is not perfect, the meaning is usually clear. The Google Translate app allows you to point the camera on your phone or tablet at text in another language and translates it on screen in real time.
